

# COB81

DRY ICE CLEANING SOLUTIONS

Get ready for the COB81, the latest developed dry ice blasting machine! Our engineers have made some nice improvements on the COB62plus to make your blasting experience smoother and more efficient. The COB81 is especially developed for focalised cleaning and high performance cleaning with low air consumption.

Better Pellet Flow: our new hopper design ensures dry ice pellets flow effortlessly, just like our bigger machines. The new design also holds 17 kg dry ice instead of 14 kg!

This machine is based on the patented CRYONOMIC® technology of ARTIMPEX NV, and meets the new EC machine directive 2006/42/EC (incl 2006/95/EC and 2004/108/EC).

The COB81 is pre-equipped to do more than dry ice cleaning: by adding a little bit of grit you can use it also as a dry ice grit blaster!
